Executive Recommendation

High Priority

Reduce StockOut risk : replenish high-risk SKUs first and shorten lead time for critical categories.

Control overstock: run clearance promotions and reduce future purchase quantities for slow-moving items.

Medium Priority:

Focus on top categories: allocate more inventory budget to Lighting and Home Decor. Prepare for seasonality: increase stock and campaign planning before Winter demand peaks.

Opportunity:

Optimize promotions: maintain promotional activities with measurable ROI since promo revenue contribution is about 10%.

Top Revenue Category

Seasonal Revenue Priority

Executive Summary

Revenue performance remains strong, with forecast revenue exceeding current revenue. However, high overstock and stockout risk indicate inventory imbalance. Management should prioritize stockout prevention for high-demand categories while reducing excess
